**Annual Meeting of
Board of Trade**

The second annual meeting of the Blairmore Board of Trade took place in the council chamber on Friday night last. There were present, R. W. Coulthard, president; W. A. Beebe, vice-president; T. B. George, secretary-treasurer; J. A. McDonald, D. A. Sinclair, R. M. Brisco, John R. Smith, J. G. Smith, W. Simpson, R. Green, D. C. Drain, J. Dutil, W. J. Bartlett.

Minutes of previous meeting were read and adopted.

Messrs. H. H. Tait, C. J. Pegg, J. Graham, H. G. Bigelow and L. H. Putnam were proposed and forthwith elected members of the board.

Selection of officers for the ensuing year took place, with the following result:

President, D. A. Sinclair.
Vice-President, W. A. Beebe (re-elected).

See Vice-President, R. Green.
Secretary-Treasurer, T. B. George (re-elected).

Executive Committee, H. E. Lyon, R. M. Brisco, John R. Smith, W. J. Bartlett, L. Dutil, J. G. Smith and J. Monrad.

Auditors, W. A. Beebe and L. Dutil.

The Board were unanimous that R. W. Coulthard should retain the position of president of the Board for a third year, but Mr. Coulthard declined, giving as his reason that he failed to see how it was possible for him to fill such a position another year and do justice to the Board. Mr. Coulthard made a few very appropriate

remarks, outlining the great future possibilities of the town of Blairmore and the important field in which the Board of Trade was a worker. He claimed that it was an established fact that Blairmore is to be the city of The Pass. Around us we had resources such as no other town in the province had, the development of which was a veritable clear profit from the earth. On all sides today these resources were being met by capital and the interest taken in these resources today was but a minor step towards the great industries of the future. Among others, Mr. Coulthard mentioned the proposed Pass Electric Railway, which is to some extent up as but a huge joke, but which he impressed upon the Board, as an interested party, would be an established fact in a few years and would assist materially in bringing together the great coal mines and other vast industries of the Crows Nest Pass. He felt safe in saying also that inside of three years the Canadian Pacific would not be the only steam railway operating through this Pass. Other railways were directed this way and eventually must come. He desired that the Board give every new industrial proposition their best inducements.

Messrs. R. M. Brisco and J. G. Smith were appointed a deputation to wait upon the directors of the Keystone Cement Co. to ascertain that the town assume liability and pay such amount, the company offering to give considerable time for the town to meet such payment. The majority of the Board, while desirous of giving every possible inducement to the new company, felt that the town was not in a position, financially, at the present time, to assume such obligation.

Since Mr. Coulthard has been residing in Blairmore he has always taken a keen interest in the town and as President of the Board of Trade has always exercised a great interest in every movement that would mature to the town's welfare. He also believed that his successors

at the head of the West Canadian developments, would continue to carry out the principles enunciated under his management — at all times and in all places, at home or abroad, ever to lay a good word for this town and seek to advance its interests.

A communication from Dr. D. Warnecke, M.P., Ottawa, was read and ordered filed.

Another communication was received from L. F. Clarry, deputy attorney general, replying to the recent request of the Board that the department make enquiry into certain crimes committed in Blairmore during the time of the recent strike.

The Board felt that the department would not fail to see that said matter would be probed to the bottom and that the guilty parties would be brought to justice and made an example of.

The secretary was asked to reply to both the communications received from the deputy attorney general, and urge a continuance of the investigation.

A communication from the Scarborough Company re census returns was read, and secretary was requested to forward them copy of message received from Ottawa re the correct population of Blairmore.

At a meeting of the Winnipeg Industrial Department, wrote asking information regarding the town and its resources, etc., and the secretary was asked to reply, giving all information possible.

The matter of reduction of fire insurance rates came up, and the secretary was asked to write the insurance underwriters, asking the number of hydrants, pressure, apparatus, distances between hydrants, etc., necessary to secure such reduction.

Smith — Brisco — That Board of Trade send recommendation to the town council for the immediate creation of a fire district. Also that council have present light system wiring inspected. Carried.

Mr. J. G. Smith informed the Board that the Keystone Cement Company's proposed route of air-line, or tram line, had been put before the council, and he would like to have the opinion of the Board in connection therewith. The plan calls for a line, crossing diagonally several blocks and lots belonging to private parties. The property involved in this line would take some \$15,000 to compensate, and the Keystone Cement Co. desired that the town assume liability and pay such amount, the company offering to give considerable time for the town to meet such payment.

The majority of the Board, while desirous of giving every possible inducement to the new company, felt that the town was not in a position, financially, at the present time, to assume such obligation.

Messrs. R. M. Brisco and J. G. Smith were appointed a deputation to wait upon the directors of the Keystone Cement Co.

The meeting closed at 11.30,

after which the members re-

paired to the Palace Cafe, where a dainty oyster supper satisfied the inner man.

INCREASE for R.N.W.M.P.

Ottawa, March 16 — Owing to the difficulties experienced in getting proper recruits for the R.N.W.M.P., and the necessity of maintaining the present standard of the forces, it is understood that the government has decided to increase the pay from 60 to 75 cents per day, and to reduce the term of service from five to three years. It is believed that the proposed conditions will have a beneficial effect on the force. There will be a corresponding increase for the officers of the force.

Dr. Connolly, who has had head-quarters at Blairmore for several months, moved to Coleman on Thursday, where he will practice in future.

A Newspaper Serial

It Was Written For One Purpose,
But Accomplished Two Purposes

By F. A. MITCHEL

Copyright, 1881, by American Press
Associations

"What we want," said the managing editor, "in our serials is a plot. We must have our characters or some one of them at the end of an installment hanging over a precipice a thousand feet deep, to be rescued in the next, tumbled overboard in midocean, left to drown, rescued again, etc. And you needn't bring it all out happily in the end. Kill the hero if you like. There's Tess of the D'Urbervilles, who was struck at the end of a serial story, and the whole world read it. — Big sales, large profits."

"You want it true to life, don't you?"

"Truth is stranger than fiction. If you'll strike a plot that every one says could not possibly happen, you'll get a serial story. The critics will call it 'rot,' but the people will want to read it. Try to do something startling. My object is to put the paper on its feet. Many a newspaper has been ruined by a serial story."

I had no confidence in the plot being established by any author I could write, however improbable I should make it, and I told Heaton so, but he told me to get out and do as he had instructed. He had no more time to talk about the matter. "You know what we want," he said: "go and do it."

I puzzled for a considerable time over a plot, but could invent nothing original. Then it occurred to me that there is nothing original except in real incidents. I took out my pen and paper and even these repeat themselves. After all, the novel Heaton had quoted had nothing startling in the plot. It was the writing of it and the tragedy at the end that determined to be content with a simple, ingenuous plot and not hang anything to do with the rest. I would drag in all the horrid details of an execution, and I hoped in this way to serve the managing editor's purpose to a limited extent. In order to make my story more harrowing, I determined that at the end of a row should be the innocent victim of circumstances.

Haycroft was my hero. Gwendolyn was my heroine. They loved. Haycroft was a man of consequence to a millionaire who was a bachelor, and, since Haycroft was the only child of several generations of older children descending from the family, his only brother (or sister, for I don't remember) was the child he died without, who would inherit all his property.

Pittibrook, the villain of the story, also loves Gwendolyn,

and I must invent some plan for him to get Haycroft out of the way.

It was very easy for me to kill the rich man and assign the inheritance to the poor man. Pittibrook

at least, was a Pittibrook man.

Haycroft was my hero. Gwendolyn was my heroine. They loved. Haycroft was a man of conse-

quence to a millionaire who was a bachelor, and, since Haycroft was the only child of several generations of older children descending from the family, his only brother (or sister, for I don't remember) was the child he died without, who would inherit all his property.

Pittibrook, the villain of the story, also loves Gwendolyn,

and I must invent some plan for him to get Haycroft out of the way.

It was very easy for me to kill the rich man and assign the inheritance to the poor man. Pittibrook

at least, was a Pittibrook man.

Nothing very original about that, you say. Well, if there is any originality in the matter at all I didn't supply it. Fate lays all the plots for stories, and all we writers do is to work them up. Nevertheless, I can't deny that I know it. I was doing the biggest job of my life. And do you know while I thought I was writing a blood and thunder love tragedy I was turning bittersweet and gall in a real household lot.

This story was coming out, the installments appearing once a week. I had convicted the hero, and he was waiting the result of an appeal which I intended to have decided by a merciful judge. I was writing the description of the hanging and intended as soon as the condemned man was dropped into the gallows to write the hero's name and coincide with her shrieks dying away gradually as doors were closing behind her in a madhouse.

The issue of the paper had appeared containing an explanation of that of course, and I had to be convinced of my innocence. Though they were not to save him, I felt bound to show my skill in finding a key to them which if brought to light would save the victim. But, relying as I did on a double tragedy at the end, I proposed to bring out no key. You see, I didn't intend to spoil the tragic effect by being chicken-hearted, especially as the people involved were merely creatures of my own brain. Besides, I remembered the instructions of the managing editor, "I want to attract the attention of the reading public, which increases the circulation of the paper and brings in the advertisements, the ultimate object of the whole thing."

About a week after the appearance of the issue containing the explanation of the incident which had proved Haycroft guilty, while I was writing the removal of Gwendolyn to a madhouse, a servant knocked at my door to say that a man was downstairs who wished to see me.

"Get out of here," I cried, "and tell the man to get out of here. I am doing work that must be interdicted."

The maid went away and returned to say that she thought the man was having a fit. If required something of

the sort to cause me to break off from

my work, and, throwing down my pen, I hastened away. The man had buried his face in the lounge pillow and was on the way to violent spasmodic convulsions. Hearing me enter, he awoke and, with a nervous smile, gazed at me on my face. He looked from me to the maid and pointed to the door. I told her to leave us and closed the door behind her. Then I turned to my visitor.

"How did you get on to it?" he asked.

"My eyes started out of his head."

"What was that?"

"My making up that prescription wrong."

"What prescription?"

"That killed the man in your story."

"Killed the man in my story?" I repeated, my eyes bulging with wonder. "I had never heard of an imaginary lawsuit, and my first impression was that it had a real before me."

"You called him 'Chester'."

"Oh, my God! He was Middleton. You might as well give the real name of the man."

I stood staring at the man for a while, then said to him:

"My friend, you must pardon me for excusing myself, but I have no time to devote to cranks. I am putting the finishing touches to the serial you suggested, and the copy must be ready this afternoon. The hero has been executed, the girl who loved him has gone mad, and—"

I didn't finish the sentence, for the fellow fell in a fit strong enough. I picked him up and laid him on the lounge, then, as I had no time to waste, I started up and began to talk in a hoarse whisper just as people on the dramatic stage do when they have something harrowing to communicate.

"I'm a drug clerk. One day a prescription came in, and I put it up in a small vial of deadly poison standing on the board where I had mixed the medicine. I had taken it up by mistake and put enough to kill any one into the mixture. I dared not stop the prescription, so I put it up and sent me to the police station and crying, 'Sudden death of Barker Middleton!' That was the name given me when the medicine was called for."

"I went back to the store, told my employer that my mother had died, and lay down waiting an hour. My secret had preyed on me but I never dreamed it would involve another life."

The man had given the key to the circumstances that had convicted an innocent man, and I had convinced myself that he was nothing but a scoundrel.

"I'm the only child of several generations of older children descending from the family, my only brother (or sister, for I don't remember) was the child he died without, who would inherit all his property."

Happenings in and Around Blairmore

A fine residence is being erected for Nick Carmala, baker.

D. Kinnes came down from Lille

on Sunday, where he had been

visiting a few days.

Rev. A. S. Tod went to Cranbrook Friday last and returned to town Monday night.

E. L. Crain, of the "Enterprise" mechanical staff, spent Sunday with friends at Macleod.

The large buildings of the Imperial Oil Co. near the depot are nearing completion.

C. Higgins, C. Ouimette and E. McDonald, of Coleman, attended the masquerade ball here on Monday night.

Mr. R. M. Briscoe will arrive from Chatham, Ontario, on Saturday. Mr. Briscoe, who went to the Hat to meet her, will also return.

The Blairmore Brewery Co. will commence their spring operations in a few days, and are only awaiting the arrival of an expert.

Mrs. Wm. Connell and her daughter Grace, from Washington state are visitors in The Pass and spent Sunday with friends in Blairmore.

The Order of Railway Telegraphers' ball will be held in the Blairmore opera house on Friday, April 19th, and promises to be a swell affair.

A county lodge of the L. O. A. was organized at Hillcrest Saturday night, and was attended by a large number of Orangemen from Blairmore.

Houses are at a premium in Blairmore at the present time and contractors and carpenters are beginning to feel that there will soon be something doing.

The Tom Marks Co. were favored with a good audience at the opera house Thursday night and their production of "His Irish Honor" elicited much laughter and applause.

Anyone who didn't have "one" of the best times of their life at the masquerade ball, at Blairmore opera house, on the 18th inst., hold up their hands.

J. M. Carter conducted a big auction sale on the ranch of Chester Wentworth, at Maple Leaf on Monday, disposing of a quantity of farm implements and stock, as well as horses, etc.

Only one thing wanted to complete the kitchen outfit as seen in the Blairmore Hardware Company's window—a maiden at the rolling pin. To roll the "dough," of course, not to spend it!

W. L. Shera, secretary-treasurer of the town, went to MacLeod on Monday, where on Wednesday he was uniting in matrimony to Miss Brimmer. The newly-wedded couple will arrive in town Saturday.

Messrs. Frazer & Murphy have been granted license to conduct a wholesale liquor store in Blairmore. They will occupy the splendid new brick building erected last year by Mr. T. Frazer at the corner of Ninth avenue and Victoria street.

The sale of work and supplies given by the ladies aid of the Central Baptist church, on Wednesday evening, in the Budd building, was a decided success. The Belgrave Sketch Club were in attendance and added very materially to the social part of the evening.

Mar On's store will be closed Monday, Tuesday and Wednesday next, in order to take stock and make up. Messrs. Thompson & Co. will re-open the business on Thursday morning. We welcome the new management of this well-known business establishment, and trust they will enjoy a great era of prosperity.

Chief of Police Irwin is busy

these days, and most all the unlucky bachelors have been made to dig up their poll taxes. He says there are more men under the age of twenty-one in Blairmore at the present time than there were three weeks ago, in spite of the fact that the influx during that time has been no greater than the exodus.

EDITORIAL NOTES

Even the council has decided to loan local coal. Guess they found too much old metal in the imported stuff.

One exchange asserts that March came in like a lamb—the kind that's sold by the local butcher. Pretty tough, eh!

Dr. Grenfell, in the course of his lecture at Knox Presbyterian church, Lethbridge, on March 14th, stated that "The people who inhabit the Labrador were of a cheerful and optimistic nature, and were rapidly taking advantage of the opportunities of improving their conditions."

The first annual concert of the Coleman choral union takes place at the Eagles' hall, Coleman, tonight, and promises to be a bright affair. Such an organization is worthy of every possible support, and we trust that ore long, Blairmore and other towns in this district will see fit to establish a similar institution. All our towns are possessed of considerable vocal and musical talent, which could well be utilized to the pleasure of our own townfolk.

W.C.T.U. and

Band of Hope

Under the auspices of the above societies an entertainment will be given in the Central Baptist church, Blairmore, on Monday evening, March 25th. Songs, recitations, etc., will be given by the children, assisted by other friends.

The mayor of Blairmore, Mr. H. E. Lyon, will preside. Chair taken at 8 p.m.

Single Tax at Work

In January, 1910, Vancouver adopted the single tax for local purposes. The first place to feel the effect of competition with it was Victoria, the capital of British Columbia. Other cities soon felt it also, and cities in the United States, including Seattle, found themselves being outstripped by their neighbor on this side of the boundary.

So many men and so much money left Victoria for Vancouver in 1910 that Victoria was forced, in self defense, to adopt the single tax for its purposes, which she did by a vote of five to one, in January, 1911. The effect was magical. In April, 1911, Victoria's building permits were \$250,000 against \$192,440 in April, 1910. In August, 1911, this had grown to \$429,600, against \$212,814 in August, 1910. In November, 1911, it reached \$616,625, against 104,295 in November, 1910, while Seattle's buildings fell off from \$1,020,325 in November, 1910, to \$449,105 in November, 1911, although Seattle's population is about seven times that of Victoria.—Grain Growers' Guide.

John W. SICKLAMITH, Gresham, Pa., has three children, and like most children they frequently take cold. "We have tried several kinds of cough medicine," he says, "but have never found any yet that did them as much good as Chamberlain's Cough Remedy." For sale by all dealers.

"Progress of Nations"

We have received a copy of "The Province of Alberta," a neat book of 250 pages, descriptive of the wealth and progress of this sunny province. The author, Leo Thwaite" (Mrs. Harold Bayley) visited the Crows Nest Pass in August last, and has the following to say of this district:

"Of particular interest are the thriving infant towns of 'The Pass' as the Alberta portion of the Crows Nest Pass is known in the West. Coleman is the principal town, with 2,500 inhabitants. Its history, typical with all the towns of the Pass, began with the acquisition of the town site about eight years ago by the International Coal & Coke Company, whose seventh annual report, recently published, showed net profits for the year under review to be \$300,097. In 1903 Coleman was wooded prairie above and coal seams beneath; in 1904 it had banking and business houses, two hotels, and a population of 500. By 1905 electric light, the telephone, and a really good water system had been installed, and the company's mine plant included a tipple with a daily capacity of 2,000 tons, a battery of 100 coke ovens, and a large power house. Next year it had a miners' hospital, and its streets, in which it takes especial pride, had been carefully graded and gravelled. To-day, standing in the midst of fine mountain scenery, it is at once a beautiful and busy town with a future."

The Denison collieries in Coleman have an average daily output of 2,500 tons of coal, mainly taken by the Canadian Pacific Railway for use on their trains, and a coking plant with a capacity of 8,000 tons of coke per month. The equipment is modern and excellent; the coal is brought out of the mines in trains of sixty or more cars, hauled by compound compressed-air locomotives, and is passed through one of the best-equipped separating plants in North America.

Blairmore is another town of the Pass which contrives to be clean and pretty in spite of its principal industry, and which will shortly add an opera house, to its attractions.

In Blairmore the chief colliery concern mines about 1,000 tons daily and is preparing to double its output, while there are nine other working collieries within a radius of eight miles.

Blairmore, the first settlement in the Pass, is situated in Old Man's Valley, and the Old Man's River flows through the town, from the valley-level to the summits of the surrounding mountains, and mining conditions could not well be better.

A mile and a half from Blairmore is Frank, the historic town of the Pass. Frank, named after its founder, a wealthy United States mine-owner, had a few years ago to cope with a great disaster, which tested the metal of the townsmen. In May 1902 the Canadian-American Coal Company started mining operations on land abutting on the eastern slope of Turtle Mountain, and by the following December the Company was producing 1,000 tons a day. In April 1903 a landslide occurred which buried the only tunnel under many thousands of tons of rock, destroyed the mine plant, and covered some two miles of the Canadian Pacific railroad, as far as the neighboring township of Lille. But within fifteen days the road was rebuilt, and in twenty days the mine was re-opened, and very shortly afterwards, having in the meantime been entirely reconstructed, it was producing at a greater rate than before."

The Alberta government has purchased 10,000 copies of this book for free distribution, immigration and publicity literature.

**Steady Exodus
From the States**

Wainwright, Alta.—From information now being received in this district it is indicated that hundreds of American farmers are preparing to come to Alberta in the spring, and that the rush of settlers will likely commence even earlier than last year. The exodus from such States as Iowa, Nebraska and Kansas promises to be especially heavy. At Des Moines, Iowa, so it is stated, leading men of the State, alarmed on account of the poor showing made by Iowa in the recent census, are planning an extensive campaign with a view to checking the exodus, and under present conditions Iowans are faced with stagnation and loss of influence in National affairs. "All over the States," reports George Arund of Kansas, "the one country that is being looked to is the Canadian West; hundreds of people from Kansas are coming to Alberta this summer."

Winnipeg, March 18.—Interest in the subject of reckless subdivision speculation continues to grow keener as the significance of this matter is being pointed out by reputable dealers and by the press. The current issue of Winnipeg Once-A-Week contains an impressive write-up along this line, the first detailed account to be published in Canada of the notorious fruit lands swindle known as the Columbia River Orchard company of Seattle, State of Washington, now facing bankruptcy proceedings and criminal prosecution in United States Courts. The company mentioned carried on a lurid advertising campaign throughout Western Canada, floating bond issue of several millions and guaranteeing its patrons profitable orchard lands and irrigated farms. Many of the victims are said to be living in Winnipeg. To make this species of fraud impossible in Canada and to put so-called land wolves and subdivision sharks out of business entirely, is the avowed purpose of legislation now under consideration with municipal and provincial governments throughout the West. From Edmonton, Regina, Moose Jaw and other leading cities of Western Canada word comes that drastic regulation of the land business is now to be put in force by legal enactment. Extensive inquiry in Winnipeg indicates that progressive real estate men here are in full accord with the opinion recently expressed by a Toronto investigator, who stated: "To crush these vipers in business, and to prevent the goodwill of this promising country from being dissipated is the purpose of the Edmonton resolution. If similar resolutions were passed all over the country, very great evil would be brought within measurable distance of complete eradication, to the lasting benefit of Canada." Meanwhile the demand for gilt-edge properties continues exceedingly strong, both in Winnipeg and suburban sections.

New Settlers Pour In

Ottawa, March 18.—During the 11 months from April 1st to March 1st of the current fiscal year 811,846 immigrants arrived in Canada. Of this number 194,388 arrived at ocean ports and 117,450 from the United States. These figures show an increase of 15 per cent, as compared with those of the corresponding months of last fiscal year which were 164,485 at ocean ports and 10,906 from the United States, making a total for the eleven months, April 1st to March 1st, of the previous fiscal year of 271,392.

During the month of February of this year, there were 11,141 arrivals, 5,893 of them having been at ocean ports and 5,572 from the United States as against 10,705 for February last year, 5,516 of whom were at ocean ports and 4,893 from the United States.

The Man Who Delivers The Goods

There's a man in the world who is never turned down, wherever he chances to stray; he gets the glad hand in the populous town or out where the farmers make hay; he's greeted with pleasure in deserts of sand and deep in the aisles of the woods; wherever he goes there's the welcoming hand—he's The Man Who Delivers the Goods. The failures of life sit around, and complain; the gods haven't treated them white; they've lost their umbrellas whenever there's rain; and they haven't their lanterns at night; the men tire of the failures who fill with their sighs the air of their own neighborhoods; there's the man who is greeted with love lighted eyes—he's The Man Who Delivers the Goods.

One fellow is lay and watches the clock, and waits for the whistle to blow; one has a hammer, with which he will knock and one tells the story of woe; and one, if requested to travel a mile, will measure the perches and rods; but one does his stint with a whistle or smile—he's The Man Who Delivers the Goods. One man is afraid he'll labor too hard—the world isn't yearning for speech; and one man is ever alert, on his guard lest he put in a minute too much; and one has a grouch or a temper that's bad and one is a creature of moods, so it's hay for the joyous and rollicking lad—for the One Who Delivers the Goods.—Wait Mason.

**Murder Trial Is
Set For April 6**

The case of M. Jasbec and E. Ebert, two Austrians charged with the murder of Constable Wilmet at Frank in 1908, and which was set to come up for a hearing before the supreme court at Macleod on February 6, will begin there on April 6th. The case will be a sensational one and it is expected that a large number of witnesses will attend the trial from Macleod.

John R. Palmer will appear on behalf of Jasbec, who is a member of the miner's union, which organization has retained Palmer.

The preliminary hearing was held at Macleod about the middle of November last at which time both men were held over to the supreme court by Supt. Primrose of the Mounted Police. It is understood here that considerable new testimony had been discovered by the Mounted Police that did not appear at the time of the preliminary.

Constable Wilmet, the murdered man, who was attached to the Macleod division of the Mounted Police was instantly killed while he was in discharge of his duties and nearly four years have elapsed since the crime, and it is stated on the best of authority that evidence of a sensational nature will be given when the case is called for trial.

**W. C. T. U. and Band of
Hope Entertainment**

This was given in the Central Baptist church on Friday evening last, and was in every way a success and a credit to the children and to the president of the Band of Hope, Miss A. Green, who trained the children in reciting, etc., and also gave a recitation herself in excellent style. Mrs. Wilkinson, Misses Edie Board, and Lillian Thomas, and Morris Peacock and E. Thomas also contributed to the success of the entertainment, the violin selections by the latter gentlemen being exceedingly well received. Refreshments were served at the close, and a very enjoyable evening was spent.

When you have rheumatism in your foot or instep apply Chamberlain's Liniment and you will get quick relief. It costs but a quarter. Why suffer? For sale by all dealers.

LOTS!**The North-West Quarter of
Section Nine****Adjoining The Town of Coleman
Will be subdivided at once
into lots and placed on
The Market.**

Lots 50 by 100 feet, will be sold at from \$125 to \$200, Terms easy and suitable to Purchaser.

Acre Lots will be sold for \$300 and parcels containing five or ten acres will be sold on easy terms.

Those applying first will get their choice when survey is completed.

**JOSEPH GRAFTON
J. H. FARMER**

**A RARE OPPORTUNITY FOR
LIVE INVESTORS****Lake City**

Is the name of the Western Terminal Point of the proposed Crow's Nest Pass Electric Railway and is already tapped by the Pass line of the C. P. R., while the G. N. R. has already approached to within a few score of miles and must eventually pass through this admirably located town.

Lake City

Is located by the shore of Crow's Nest Lake, only a few miles east of the provincial boundary between Alberta and British Columbia, and just north of the international line. In reality, it is at the top of Canada where the majestic Rockies tower in serene magnificence over great chasms and numerous fiords, reflecting their presence on the waters of this beautiful lake. Here also are afforded the very best tasks for the daring mountain climber and for huntsman who desires to outrival the quiet ways of the Rocky Mountain goat, sheep, deer or elk, which are the monarchy thereon. In close proximity are numerous timber, mineral and fuel resources, development of which is now in its initial stages. These resources include gold quartz, coal, iron and pulp wood.

Crow's Nest Lake has long been looked upon as an admirable location for health and tourist resorts, and but now this promise is being realized. Plans for hotels, etc. are being arranged, as well as boat houses, and the most modern pleasure yachts will soon glide over the surface of this beautiful lake.

But a few weeks ago lots were placed on the market, and the agents have had their hands full attending to purchasers. Prices run from \$100 up. For further particulars apply to the agents:

XVIII.—Long Life In the Home

By EUGENE L. FISK, M. D.
Copyright, 1910, by American Press Association.

Our care should not be so much to live long as to live well.—*Stevens.*

WISE man said: "There appears to exist a greater desire to live long than to live well. Measure by man's desires, he can not live long enough; measure by his good deeds, and he has not lived long enough; measure by his evil deeds, and he has lived too long."

More length of days as measured by the calendar is but a poor thing to write about. The "filling" that goes into those days is the real measure of life.

To encourage a selfish and punctilious regard for the attainment of a phenomenal span of life is not in keeping with the higher ideal of philosophy or science.

Life is a Trust Fund.

In considering this problem we should bear in mind, however, that life is something that we hold in trust. At least that is the dictum of the best thought that has come to us through the ages. We have no right to handle this trust fund with careless spendthrift indifference; neither may we guard it with such miserly care that it shall earn no interest in good deeds and human achievement. Society condemns the suicide in the same degree that it lauds the patriot or the hero who gives up his life in a good cause.

But some people lack a sense of proportion. The degree of their sacrifice is out of all proportion to the cause in which it is offered up and the possible erosion of higher responsibility, and the redress injury to others is often overlooked.

Sharing the emergencies of war and accident, there are few circumstances that warrant the deliberate forfeiture of life or persistent neglect of health.

It is better that the worker, whether humble breadwinner or lofty states-

Copyright by Underwood & Underwood.

JOHN D. HOCHEFELDER, AT SEVENTY, ON GOLF LINKS AT AUGUSTA, GA.

Golf, billiards, bill climbing, hunting,

fishing, are all beneficial forms of exercise which may be indulged for into old age.

man, should be spared to work long and under proper restraint and poise than that his life should be burned up prematurely in feverish and often misdirected effort.

The first step, therefore, in planning for long life in the higher meaning of the term is to acquire a sense of proportion.

What is Old Age?

Cazzals said: "a man is old as his arteries." True enough, but far from being a definition of old age. To define old age we must first define life.

Herbert Spencer tried to define life and succeeded admirably in some respects, but that is nothing in his defense. Let us explain why the human clock runs down in less than a century instead of running for several centuries.

Preparing For Old Age.

Preparation should begin in youth. One original observer, Charles Sedgwick Minot, has advanced the seeming paradox that we grow old in childhood and old age; that cell change is far slower in the sixth decade of life than in the first six months of boyhood. In a certain physiological sense this is true.

The hardened arterios at forty may be the result of poor feeding, lack of physical training, improper breathing, and defective respiration during childhood. Give the child a fair start in the race. This is far better than to devise drugs and potions for the relief of the maladies of maturity and old age.

The Effects of Life Strain.

It is true that long life is often a matter of the quality of one's "table age." The diseases that are responsi-

ble for the larger part of the death rate after middle life are of the degenerative class, involving the heart, arteries and glands. Indeed, wherever one of these conditions exists the others usually are present to a greater or lesser degree.

These conditions may be due to nerve strain affecting the heart and arteries or to the degeneration of the products of biological principles, such as indigestion and insufficient combustion. In fact, these troubles are usually the result of interdependence in eating, drinking, working or playing.

Degenerative Diseases.

A most commendable and enthusiastic campaign is being waged against tuberculosis and other infectious diseases, but deaths from heart disease, kidney trouble, hypertension, etc., exist on a grand scale and are taken as a matter of course. The death rate from tuberculosis has been reduced about 50 per cent in the past thirty years, while during that same period the death rate in the United States registration areas from diseases of heart, blood vessels and kidneys has increased 105 per cent.

This is a nut to crack for well meaning people who shut their eyes to all that is unpleasant and sinister in our civilization and have the thought that the world is necessarily growing better every day.

The average duration of life has undoubtedly greatly increased in the past century, but the increase is due to the lowering of the death rate among young people. After middle life there has been a decided increase in the death rate. At least the evidence available in this country warrants this belief.

No such increase is shown by statistical studies until the age of sixty-five is reached.

The "high cost of living" may be a factor in that the struggle for existence is harder and involves more strain. I am inclined to the belief, however, that too much prosperity is a much more potent cause of the high death rate among the elderly.

The amount of food that is wasted

in the average American family is appalling, and this surplus of nutrition,

combined with the strenuous life and intertempore habits fostered by our rapidly developing and complex civilization, may well account for the remarkable increase in the mortality from degenerative diseases.

Prevention.

As I have already suggested, a good start in childhood carries a man against these degenerative afflictions. But the strongest constitution in maturity may yield to abuse, and the time is coming when the man who throws away the splendid asset of health will be looked upon as a social outcast. Since these degenerative afflictions that lead to premature old age are the result of intertempore, use the term in its broadest sense, temperature, also used in its widest significance, is the keynote of prevention.

Importance of Exercise.

As middle life approaches and there is a slowing down of the vital activities it is dismally evident for exercise often develops. This is to certain certain normal. The man of forty who attempts to keep up with football, baseball or even tennis is taking heavy chances. The strain on heart and arteries can lead to chronic changes that will not be removed by a full rest from exercise. But with the abandonment of active sports and with neglect to exercise there is often an increase in the amount of food and stimulants taken, and with increasing busyness and other activities the "varnese becomes evident."

It is important, therefore, to preserve a proper balance in these things. Slow down in the matter of strenuous competitive exercise, but get enough exercise to burn up your food and prevent the accumulation of fat and food poisons.

Slow down in the matter of diet and do not let the pleasures of the table tempt you to gradually increase in weight. The pleasure of eating should be the pleasure of life are re-established.

Golf, billiards, bill climbing, hunting, fishing, are all beneficial forms of exercise which may be indulged for into old age.

Alcohol in Old Age.

It used to be thought that wine was good for you in old age, but what physician gave you pronouncement against this view? There is no sound physiological reason why alcohol should be beneficial in old age, and in clinical practice it is found to be injurious. How the feeble tissues of the aged can be helped by a cell poison like alcohol it is difficult to conceive.

Value of Fasting.

Regular bathing, preferably the cool shower or plunge, by keeping up a good skin action relieves the heart and kidneys of extra work and favors the maintenance of a normal tension in the blood vessels.

Diarrhea of Constipation.

Metchnikoff believes that the absorption of toxic matter from the large intestines is an important influence in causing old age. He suggests the use of sour milk or a preparation of the buttermilk which cause milk to become sour to inhibit the microorganisms that inhabit the large intestine.

Some painstaking experiments have been made along this line, but the results thus far are negative.

However, buttermilk and other soups, milk, etc., are beneficial and may be tried especially where there is constipation or intestinal fermentation. All natural means should be tried to prevent constipation by avoidance of concentrated meat diet and by use of fruit, seeds or other easily digestible substances between meals, exercise of abdominal muscles, etc.

WHAT MARION HARLAN SAYS.

Her New Year Message to Discouraged Housewives.

Perhaps there is no more familiar name and certainly none that carries more weight in household advice than that of Marion Harland, who has been writing for years. Mrs. Edward Ternan (Marion Harlan) recently celebrated her eightieth birthday and was the recipient of many letters, telegrams and gifts from all over the country. She is best known by her cookbooks, but her household talks, written for newspapers, are read by women all over the country. The following is an extract from her New Year's talk to housekeepers: "The year

that is dead was trying to ... thousands of wives and mothers throughout our land, there were whole dairies of Red Polled cattle. The breed was then universally polled—that is, without horns—and at about that time a number of farms were near together co-operated to improve their Red Polleds by careful selection," writes P. G. Henderson in the *Breeder's Gazette*.

The first importation of these red and hornless milk and meat producers was made to the United States in 1873, consisting of one bull and three cows.

The date of their introduction into the United States in any considerable numbers, however, is not known. At that time these docile hornless and uniformly red cattle were making their first appearance before the American public.

The introduction into the belt of animal husbandry in America of a breed of cattle purporting to be profitable to milk producers and also good on the block was naturally resisted by the advocates of special purpose cattle of both beef and milk type. Evidence to the contrary was slow in coming.

Happenings in and Around Bellevue

Alfred Lonnier is working at Blairmore.

bert Connolly, of Spring Creek, is visiting in the camp.

J. Jackson is confined to the house through illness.

Charles Burrows and family have moved up from Frank.

Edward Drake, of the South Fork, was in the camp last week.

The stock of Chet Wentworth was sold by auction on Monday.

Jim Marshall is confined to the house with an attack of "grippe."

Mr. and Mrs. Quirk have moved up from Fernie and will locate here.

Mr. Simpson, of Frank, has been engaged as master mechanic with the Hillcrest Collieries.

Peter Radcliffe, Fred Padgett and Luther Goodwin, visited Blair more on Saturday night.

Mrs. J. B. Rudd has gone east to Lethbridge on a business trip, and will be absent a few days.

Jack Carney, of Cowley, was in town Monday, and his brother, Jim Carney was up on Tuesday.

A large number of Bellevue people attended the masquerade ball in Blairmore on Monday night.

The St. Patrick's dance at Hillcrest on Monday night attracted a large number of Bellevue people.

Rev. Mr. Irwin will preach in the church next Sunday night upon the subject "The Remedy for the Problem of Poverty."

The Sketch Club were engaged to give a sketch at the sale of the Ladies' Aid of the Baptist church, Blairmore, on Wednesday evening.

William Jolly, of Frank, is working in the Bellevue mine, and is a splendid acquisition to the Bellevue band. He will move to town as soon as he can get a house.

An accident in the mine on Saturday resulted in a severe injury to one of the Belgians who have recently come to the camp. He will be laid up for some time as a result.

The boxing contest in the Socialist hall, on Monday evening, afforded much amusement and an exciting time for the spectators who crowded the house. The main bout between Grainger and Morris was a fine exhibition of strength and skill and after ten rounds resulted in a draw. The preliminary between Taylor and Burk was also good. James Burke acted as time keeper, Bob Levitt and Hughie Macdonald were judges, and Charlie Burrows was referee.

St. Patrick's day was fittingly observed by a social given in the Methodist church on Monday evening. The things dear to an Irish heart were much in evidence. Rev. W. T. Young, of Frank, a genuine son of old Ireland, greatly amused the audience with a volley of Irish ditties that flowed in such abundance that everybody was in constant laughter. Fred Padgett and Dave Hutton, of the Bellevue Sketch Club, gave a very interesting sketch entitled "The Rival Lovers," and followed it by a duet, "You Cannot Stop Your Heart from beating for the Girl You Love." Mrs. Fred Wolstenholme sang "Kilarney" very effectively, and Geo. Christie also rendered a pleasing solo. The Bellevue band again proved their ability by two Irish selections. The happy event closed with a supper in which roast potatoes and hot corned beef figured prominently.

Happenings in and Around Frank

Wm. Simpson started work in Hillcrest on Monday night.

Several of the Frank dancers attended the dance in Blairmore on Monday night.

The girl's Club of the church held an interesting social at the church last Wednesday night.

C. Burrows and family have moved to Bellevue where he and his son have got work in the mine.

Mr. and Mrs. McLean who moved in town a few weeks ago, moved back to Lethbridge on Monday.

Things looked like old times in Frank on Saturday on account of it being pay day. Everybody was busy.

A large crowd from Bellevue and Hillcrest came up on the 7 o'clock train on Saturday and returned on the 9 o'clock.

Some who are still working here have moved their families to Blairmore; Messrs. Mike Murphy, Ed Donkin, Chas. Patmore and Mc Donald being among them.

A large number of men from here attended the Morris-Grainger boxing contest at Bellevue on Monday night last, and report one of the cleanest exhibitions ever put on in The Pass.

If you have trouble in getting rid of your cold you may know that you are not treating it properly.

There is no reason why a cold should hang on for weeks and it will not if you take Chamberlain's Cough Remedy.

For sale by all dealers.

Somerton now big jewelry sale is attracting a good trade. Don't miss it.

Dave Kinneir, of Blairmore, has accepted a position on the virtual staff of the Imperial hotel.

W. J. Rudd, of the Keystone Cement Co., was in town during the week and registered at the Rocky Mountain Sanatorium.

A meeting of all the ratepayers of the town was called by Chairman McGowan on Monday night, in the school hall. There was a good attendance.

Mr. Romanius closed down his store on Saturday night. He just opened here after the settlement of the strike and has closed on account of the slide report.

A. A. Muller, president of the Keystone Portland Cement Co., is leaving Saturday for Brussels in the Company's interest, and will return the first part of May.

Those who attended the masquerade ball given in the opera house at Blairmore on Monday night report having had a most enjoyable time.

Annual Masquerade

The masquerade ball given in the Blairmore opera house on Monday, was one of the most enjoyable and successful events in Blairmore's history, about 180 people took part in the masquerade and some 80 or 100 occupied view stations on the balcony. Dancing commenced at 9:30 to the strains of Professor Crawford's orchestra, and the "curious looking creatures" tottered over the spacious floor, no one knowing who's who, until 11:30, when all suppositions were met with disappointments and surprises. Luncheon was served at 1 a.m. To give a description of the different costumes would take up more space than we can this week afford, but altogether there were dandies, especially among the ladies, some of whom brought very prominent the colors of Ireland's national emblem, and some of the gentlemen pledged themselves to represent the "Land of Bobby Burns." The committee in charge deserve great praise for the successful termination of the affair. Among those present were quite a number from all parts between Lethbridge and Fernie, all of whom speak glowingly of the treatment accorded them by the Blairmore folks.

NOTICE

Notice is hereby given that from this date, March 20th, I will not be responsible for any debts contracted by my wife, Catherine Alexandra Vanemalsak.
